

AIRBUS H130

ZS-TNS

ExecuJet
LUXAVIATION CMI GROUP

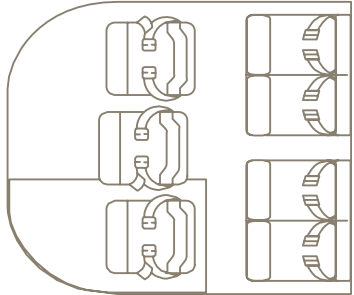

This turbine-powered helicopter was introduced to the market in 2001 and is a development of an earlier model. With its wide, air conditioned cabin and quiet operation it is ideal as a corporate shuttle option. The 3-blade main rotor and the “Fenestron” tail rotor result in its renowned quietness of operation that is welcomed around noise-sensitive areas. With seating for 6 passengers and upto 400kgs of baggage this is the ideal mode of transport to satisfy business and leisure travel needs, avoiding traffic congestion on the ground and connecting efficiently with your onward travel itinerary.
