

SUPERVAN 900

ZS-EPZ

The Supervan 900 increases the standard Cessna Caravans performance capabilities and is the ideal aircraft for any African flying safaris with its VIP seats and ample cargo compartments. It is the ultimate aircraft for sightseeing along your journey and is able to operate into unpaved runways. The single TPE331-12JR engine supplies plenty of power (900SHP) to get in and out of shorter airfields without having to leave anyone or anything behind. This aircraft is faster, safer and more efficient, being the most technologically advanced turbo-prop engine in its category.
